

Violence Risk Assessment Training for Title IX – Agenda

- Overview of VRA requirements and practice
 - An overview of key VRA principles to include transient and substantive threat, action and time imperative, violence risk factors, stabilizing protective elements, actionability/lethality determinations and the differences between affective and targeted/predatory violence.
 - Building interview rapport and reducing defensiveness
 - The flow chart model of violence risk assessment
 - Discussion of results and overview of case management
 - Collaboratively working with on-campus counseling and BIT, CARE and threat teams
- Case Study Application
 - Discussion of three case studies to include:
 - Social Media and text-based harassment and threat related to Sexual Assault
 - Direct threat and conditional ultimatums related to IPV
 - Stranger based threat related to stalking
 - Discussion of the assessment process
 - On-campus with BIT, CARE or threat team member
 - On-campus with counseling staff
 - Off-campus with VRA professional
 - Examples of threat assessment and VRA write ups for each case to serve as examples of the types of analysis that should be expected by Title IX
 - Review of questions and discussion related to the cases.
